

**Air-O-Spra System**

**Includes:**

- Hand Unit
- 10 foot braided hose
- 12 oz Plastic Bottle
- ¼" pipe-threaded fitting

This easy to handle unit is specially designed for use with bulk products. It operates entirely on the atomizing principle. Air-O-Spra has a combination internal and external action in which mold releases, lubricants, cleaners, etc., can be atomized at low pressure and low mist. Any air compressor providing 50 PSI is ideal for this unit.

**Charge-It!**

**Refillable, Rechargeable Aerosol**

Extremely dependable, with an almost indestructible stainless steel and polyacetal construction, you can fill Charge-It! with liquid product and charge with compressed air (up to 150 PSI). The aerosol spray walls and tips feel and spray similarly to a regular aerosol and are simple to replace at very little cost. Various spray tips and valves are available. Designed to be used with bulk products.

**Valve-Up**

**Giant Aerosol Cylinder**

This money saving aerosol is a versatile spraying unit for use with automated or robotic equipment. It can be used with the Handheld Spray Unit to create a self-contained spray system. Each "one-way" disposable cylinder equals approximately four dozen 16 ounce aerosols. 100% usable, giant cylinders are offered in many products. The hand held spray unit comes with assorted spray tips and 10 foot hose.

**Freedom Automatic Spray Unit**

- Just plug and spray
- Easy to use, no hard wiring required
- Save money and save time
- Operate more productively

The new Freedom automatic spray unit is easy to program and works autonomously from all your equipment. You just plug it in and spray. A proximity sensor placed near the mold cavity detects when the mold opens and signals the unit to deliver release. Nozzles can be attached with brackets (included) or optional magnetic mounting blocks.

*Tank not included*

You are free to position them anywhere to spray release to any point, such as trouble spots in the cavity, the entire face of the mold, both mold cavities, or even to create a "cloud" of release between the cavities. The extremely compact control unit has protective rubber feet so it can sit on any flat surface, or it mount directly to the machine. And it can either be plugged directly into any 110V, 15 amp circuit.

The Freedom unit comes complete with: easy-to-program control unit, 10-ft spray hose and two nozzles, 6-ft cord and proximity sensor, 5-ft tank hose, and 10-ft power cord. Experience the true Freedom of hands-free automatic spraying with the new Freedom unit from Slide.

**Spray Can Holder**

The new spray can holder helps organize your space and keeps cans in place. Extruded from PVC, these extremely durable can holders can easily be bolted directly onto the side of a molding machine or tool cart to hold various cans.
